Please refresh your browser to upload the most current report

The National Mango Board (NMB) publishes the Mango Crop Report on a regular basis using information from industry organizations and other sources in an effort to provide the best available information on shipment projections, actual arrivals, variety and size availability, and other figures considered useful to the U.S. mango market. Although this information is updated regularly, changes can occur due to numerous factors at any given moment in time. Accordingly, the Mango Crop Report should only be used as a guide.

The Mango Crop Report is updated weekly and can be found at mango.org/crop

Note: the National Mango Board is working with organizations in the mango-producing countries to get projections of what will be shipped to the U.S. This document contains information from countries that are currently shipping or planning to ship in the near future to the U.S. and does not represent the entire year. The crop report document will be updated as we receive new information from each country. Other valuable tools include (these are links):
